## **CHALLENGE VIDEO: Not A Novelty . . . A Sport**

Sales of our Challenge model continue at record levels, more than one year after introduction to the market.

These record sales attest to the continued profitability of the Challenge Video for the operators and locations.

Due to the unique playing features and the unmatched reliability, Challenge remains unchallenged.

The MIRCO Table Top Video model is known throughout the world for quality in design engineering and reliable electronic components. The circuit design of the Video game has been carefully designed by MIRCO's computer engineers. Annoying noises and distortion are avoided in the MIRCO Video products because the printed circuit board has been engineered specifically to the needs of the Video game to avoid overtaxing the PC board. Before the Video game is delivered to the customer, there is an extended burn-in period to insure a reliable product.

The quality and service of the MIRCO Video product line are the reasons why there are thousands of satisfied customers throughout the world.

Equal to MIRCO quality is the MIRCO service. All the Video game components are warranted. When a PC board is received from the customer for repair, it is tested, repaired and on the way back within 24 hours.
